

Strength in the manual lifting

The HX 10M series allows easier and lighter manual lifting up to a height of 800mm, creating a useful workbench suitable for places like mechanical workshops. It can also be used to support other machines in production, picking and similar areas.

12 months warranty

The front stabilizers improve its balance, making the work easier even when lifting and working with heavy loads.

Front stabilizers (optional)

Control lever

All the controls (lowering / neutral / lifting) are available in a single lever for simple and safe control.

At a height of over 400mm, the rear stabilizers make the HX 10M a very safe and steady working platform, preventing rocking and movement in all directions.

Rear stabilizers
