

Platform ladders with large flat steps equipped with comfortable platform, handrails and guardrail of 91 cm. Made of ribbed extruded aluminum. Supplied disassembled they can be easily assembled thanks to the detailed instruction booklet. The back frame of the PALCO model is almost perpendicular to the ground in order to allow the operator to be very near to the machine/wall. When the operator climbs the ladder, the spring system makes the ladder rest on the special rubber feet blocking it for work. The pedal brakes on 2 of the 4 wheels make the ladder even more stable which, once unloaded, can be pushed by the operator on the 4 wheels to the workplace.

If the work platform exceeds one meter in height, it is advisable to equip the stairs with handrails on both sides.

Palco

n.	m	m	m	m	Kg
3	0,66	1,57	2,66	0,77x1,24	38,00
4	0,90	1,81	2,90	0,82x1,41	41,00
5	1,14	2,05	3,14	0,88x1,58	45,00
6	1,38	2,29	3,38	0,94x1,75	48,00
7	1,62	2,53	3,62	1,00x1,92	52,00
8	1,86	2,77	3,86	1,07x2,09	56,00

A handrail is included in the package - The platform is considered as a step

PALCO & PONTE

- Aluminium platform cm 60x80
- Rung depth: 20 cm
- Distance between steps: 24 cm
- Ramp profile: 65x25 mm
- Ramp inclination: 55°
- Toeboard height: 6 cm
- Ramp width: 60 cm
- 2 spring castors mm Ø 125 mm w/brakes
- 2 spring castors mm Ø 125 mm
- Front landing (PALCO)
