A photograph of a CargoMaster stairlift installed on a white tiled staircase. The device is black and blue, with a silver metal handrail. The background shows the curved wall of the staircase and the tiled floor. The text is overlaid on the left side of the image.

## Versatile and cost-effective — CargoMaster increases your efficiency

The transportation of heavy goods sometimes exceeding your personal weight can easily lead to accidents or even health problems. CargoMaster not only moves heavy loads, you may also put the second person, often necessary to deliver goods, in a more efficient place elsewhere. That's why the device pays for itself in a very short time.

The C-series is particularly helpful in situations concerning logistics, trades and crafts where not only a safe transportation of goods is called for, but also climbing speed and versatility.

The CargoMasters of the C-series include the C141/C141 Vario, with a loading capacity of up to 140 kg as well as the C 171/171 Vario capable of transporting loads up to 170 kg. Depending on the load the device manages up to 30 steps per minute.

Reduce health risks and costs by letting the CargoMaster do your heavy work.

170kg

**Safely and effortlessly —**  
The CargoMaster is  
powerful and quick

Stacked goods such as drink cartons or paper, but also barrels, can be moved easily with the CargoMaster. With this powerful transportation aid one person can transport up to 170 kg safely and with little effort in one single operation upstairs or downstairs.

Even narrow stairs are no problem for the CargoMaster. Its safe climbing mechanism manages even winding stairs and can be used on virtually every type of surface. The steps' edges are not damaged.

Single step control

Continuously adjustable climbing speed

CargoMaster adapts perfectly to each different situation of transportation. One battery charge is sufficient for 15 – 30 floors.

CargoMaster features a continuously adjustable speed control, and safety brakes make sure that the device stops automatically at each edge of a step. Adjustments in movement and speed on the stairs are possible at all times. Thanks to the serially equipped single step switch (model C170 and C171 Vario) even narrow staircases can be mastered. (Available as an option for the models C141 and C141Vario).

Due to its low weight you can take the CargoMaster virtually anywhere. It features a hinged toe-plate, so you can store it tightly in the car.

The reliable climbing mechanism safely manages each step

## Multitalented and no breakdowns

# — work with the CargoMaster

Both as a stair climber and as a trolley, the CargoMaster is an indispensable transportation aid on stairs as well as on level ground.

Its strong electric engine is powered by batteries, which can be charged by the main supply circuit. We recommend to get a charging cable as an accessory to be able to charge the batteries in the car. With an additional battery pack you can thus use the CargoMaster continuously. Due to its solid rubber tires the CargoMaster is free of breakdowns — even when it is in continuous operation. Handling it is comparable to devices featuring air tires.

Because of its easy handling and low weight the CargoMaster is an indispensable tool for transportation.

Both inside and outside — CargoMaster is your strong partner in every environment.

We offer a great variety of accessories for special solutions to adapt your CargoMaster perfectly to individual tasks of transportation.

You can store your CargoMaster tightly by folding up the toe-plate.

## CargoMaster — an all-rounder with intelligent accessories

Intelligent accessories make the CargoMaster perfect for all kinds of different transportation problems.

The vertical lift is an ideal accessory for using the CargoMaster also to load and unload goods to and from shelves. Loads up to 100 kg can be lifted onto or from shelves of up to 1.20 m in height. The vertical lift is available as an electrical or manual model. The latter is operated by a crank handle.

With the grips in the tightest position the C141 Vario (171 Vario) only measures 1060x450x300 mm and fits into any car without problem.

CargoMaster

C141 V  
C171 V

In addition to all the advantages of the C-series, the models C141 Vario (C171 Vario) also feature adjustable grips in height and angle. Thus this ver-

satile model can be adjusted to the user's height and the center of gravity can be adapted depending on the device's load.

## Standard version

The delivery package includes a stair climber (C141, C141 Vario or C171, C171 Vario respectively) plus battery pack, charger and lashing strap.

## Intelligent accessories — for all conceivable problems of transportation

**Holding device for grocery boxes**  
To secure grocery boxes.

**Support for round goods**  
With a diameter of approx. 150 to 800 mm.

**Support for washers and dryers**  
Holding device plus strap, can be adjusted from 510 mm to 630 mm, to secure wide goods for transportation.

**Hook for crates**  
Holding device for crates.

**Portable stairs, holds a load up to 350 kg**

Thanks to these portable stairs your delivery vehicle can be easily and comfortably loaded and unloaded with the CargoMaster. Boot sills between 480 mm and 900 mm are possible. If your vehicle has a tow-bar, you need portable stairs with an extended plate.

**Stairs for very heavy loads with extended plate, made of steel, take a load up to 500 kg**  
This is intended for the transportation of extremely heavy loads.

**Wheel for transportation**  
With this support wheel you can push loads on level ground with little physical effort. That way you can quickly switch from climbing stairs to pushing on level ground. You can also transport tall loads through door frames.

**Automatic lashing strap**  
Incl. automatic roll-up operation  
Length 3 m, Width 5 cm.

**Special water bottle carrier**

Constructed for 5 bottles.

**Back wall**

Made of steel with felt cover to protect the load from sliding or being scratched.

**Vertical lift (manual)**

To lift or lower goods up to 100 kg.

**Vertical lift (electrical)**

To lift or lower goods up to 100 kg.

**Battery pack**

If you want to use your CargoMaster continuously, we recommend a second battery pack. That way one battery pack is at work in the CargoMaster, while the other one is charging.

**Mega battery pack**

Battery pack with a greater capacity.

**Charger**

If you have two battery packs, we recommend to get a second charger as well.

**Charging cable for the car**

With this charging cable you can charge the battery pack, while you drive to your next appointment. Available for 12 V and 24 V.

**Pneumatic tires**

black.

**Pneumatic tires**

grey.

**Extended grips**

20 cm longer than standard grips (Only for the models C141V and C171V).

**Locking system for toe plate**

To fix the toe plate.

**Increased climbing height**

Expansion + 0,5 cm.

**Increased climbing height**

Expansion + 1,5 cm.

# Range of toe plates

## Special toe plates C-System

Select the appropriate toe plate from our range of toe plates. Of course we produce all types of special toe plates according to your special demands.

# CargoMaster C-Series — the multitalented transportation aid

We at AAT develop intelligent technology to support and relieve you concerning problems of transportation.

We use our skill and expertise, based on many years of experience, to conceive innovative transportation and climbing aids. Our CargoMaster offers numerous advantages:

- **Safe transportation of heavy goods up to 140 kg (170 kg) upstairs and downstairs**
- **Ideal for logistics**
- **Applicable on virtually all types of stairs**
- **No damage of the transported goods nor the stairs**
- **Maneuverable like a hand truck on level ground**
- **Continuously adjustable climbing speed**
- **Automatic safety brake**
- **Maintenance-free**
- **Lightweight and sturdy frame made of aluminum**
- **Toe plate, foldable, fixed is optional**
- **Puncture-proof tires, pneumatic tires optional**
- **For steps' height up to 210 mm, optional 225 mm**
- **Device turns itself off automatically**
- **Great variety of accessories**
- **Very small pack size (1060 x 450 x 300 mm) referring to the Vario models**
- **High maneuverability, also on winding stairs and narrow platforms**
- **Two modes of operation (single step mode/multi-level mode) ) referring only to the C141V and the C171V**
- **Quick-release batteries**
- **Made in Germany**
